

SUPERCHARGE HV
8.4VOLTS HIGH OUTPUT

Congratulations on your purchase of a Team Orion Supercharge HV 1300mAh battery pack. All Supercharge Micro battery packs are assembled using the latest nickel metal hydride cells and include a TRX® connector fitted with 16 AWG wire.

To achieve maximum performance and reliability please follow these simple guidelines:

Charging: Team Orion Supercharge packs should be charged at no more than 1300mA (1.3 A). We recommend using chargers with the specific capability of charging micro battery packs.

Warning: The battery pack is guaranteed to work when delivered. Any damage due to misuse by the user will be repaired at the user's expense. No liability will be taken for any damage to the pack or its environment.
